

APPLE TREES

Cortland

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears in 3-4 years, ripens in late September, mid-season bloom. Fruit is crisp + tart. Good for eating fresh or cooking and baking.

Fireside

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens late September-early October. Sweet flavor, crisp texture, and good storage life.

Freedom

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens in late September. Tart flavor, crisp texture, good for all purposes.

Honeycrisp

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens in late September. Sweet flavor, crisp texture, excellent all-purpose apple.

Honeygold

APPLE TREES

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens early-mid October. Sweet flavor with a crisp texture, good all-purpose apple.

KinderKrisp

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms early season and ripens in late August. Small sized apples with a sweet flavor and crisp texture. Best used for fresh snacking but is a good all-purpose apple.

Liberty

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens in late September. Sweet and crisp apples that can be used for all purposes.

Snowsweet

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens in mid-late September. Very sweet and tender apples that make an excellent applesauce.

Sweet Sixteen

Zone: 4-7

APPLE TREES

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens in mid-late September. Crisp bite and sweet flavor that some say tastes like cherry candy!

Triumph

Zone: 4-7

Maturity Height: 10'-15'

Rootstock: Semi-Dwarf

Spread: Approximately 10'-15'

Fruit: Bears fruit in 3-4 years, blooms mid-season and ripens late September. Crisp bite with a pleasant tart that is an excellent all-purpose apple.

Yellow Transparent

Zone: 3-6

Maturity Height: 20'-30'

Rootstock: Standard

Spread: Approximately 20'-30'

Fruit: Bears fruit in 6-9 years, blooms in early season and ripens in late July through early September. Tart flavor with a crisp texture. Great all-purpose apple but does not store well.

Chestnut Crabapple

Zone: 2-7

Maturity Height: 20'-30'

Rootstock: Standard

Spread: Approximately 20'-30'

Fruit: Bears fruit in 6-9 years, blooms in early season and ripens mid-late August. Sweet and juicy apples that are best for fresh eating.
